

ABDUL TARIQUE WARSI

AI, PYTHON AUTOMATION & DATA SCIENCE ENGINEER

Phone: +91 8770463418 | Email: abdultarique5@gmail.com | LinkedIn: linkedin.com/in/abdul-tarique-warsi | GitHub: github.com/ATWISHERE | Jabalpur & Bhopal, MP, India

EXECUTIVE SUMMARY

Innovative Python Engineer & Automation Specialist with a track record in developing high-throughput OCR extraction engines, RPA bots, and Machine Learning predictive models. Board Topper (90.3%) with strong analytical foundations, experienced in processing tens of thousands of complex records with zero truncation and deploying event-driven orchestration workflows.

TECHNICAL PROFICIENCIES

Programming & Core:	Python (Advanced), SQL, C++, Bash/Shell, Git/GitHub, Docker Basics
AI, ML & Data Science:	Scikit-learn, Pandas, NumPy, OpenCV, PyTesseract OCR, Random Forest, Decision Trees
Automation & RPA:	PyAutoGUI, openpyxl, n8n, Zapier, Android Debug Bridge (ADB), Tkinter GUI
Analytics & BI:	Microsoft Power BI, Advanced Excel (Dynamic XLOOKUP, Pivot, Solver)

ENGINEERING PROJECTS & EXPERIENCE

Multi-Threaded PDF & PyTesseract OCR Table Extraction Engine

- Architected a multi-threaded desktop extraction pipeline in Python Tkinter processing scanned PDF invoices at 40+ pages/sec.
- Designed regex column-splitting algorithms achieving 100% data validation with zero string truncation.
- Integrated direct-to-database structured synchronization for automated accounting ledger entry.

PyAutoGUI Student Ingestion RPA Bot

- Programmed an autonomous RPA bot utilizing PyAutoGUI and openpyxl, automating 1,450+ student record entries.
- Implemented dynamic screen coordinate calibration with fail-safe error handling, eliminating manual entry errors.
- Reduced administrative processing turnaround time by 82%.

AICTE Edunet — 10,000+ Records Crop & Fertilizer ML Predictor

- Developed and evaluated Random Forest and Decision Tree models across 10,000+ soil telemetry samples.
- Attained 92.4% test accuracy and 0.968 ROC-AUC score in recommending optimal crop and fertilizer schedules.
- Built interactive exploratory data analysis (EDA) dashboards illustrating feature importance.

Enterprise Workflow Automation: n8n Mesh & ADB Daemon

- Engineered an event-driven automation mesh connecting webhooks, data sanitizers, and Android devices via ADB.
- Automated mobile app test runs and log scraping with zero disconnect faults over 48-hour reliability trials.

EDUCATION & HONORS

- **Bachelor of Technology in Computer Science & Engineering** — Bhabha University
- **Most Outstanding Student of the Year (2024)** — Global Skills Park Bhopal
- **90.3% NCVT Board Topper (State Rank 1)** — Govt. ITI Jabalpur
- **HarvardX CS109x Verified Credential** in Data Science & Machine Learning
